

/home/tariq/Documents
/MATLAB/Robust-View-Graph
-SLAM/include/Exception.h

```
graph TD; A["/home/tariq/Documents<br>/MATLAB/Robust-View-Graph<br>-SLAM/include/Exception.h"] --> B["cstddef"]; A --> C["stdexcept"]; A --> D["string"];
```

The diagram illustrates the inclusion of standard C++ headers in a source file. A central box at the top contains the file path: `/home/tariq/Documents`, `/MATLAB/Robust-View-Graph`, and `-SLAM/include/Exception.h`. Three arrows point from this box to three separate boxes below it, each containing a header name: `cstddef`, `stdexcept`, and `string`.

`cstddef`

`stdexcept`

`string`
